required.

1. This Office Action is responsive to the Amendment filed on 3/30/04.

Claim Objections

2. Claim 1 is objected to because of the following informalities: it appears that "a differential circuit" on line 8 should be --a differential current--. Appropriate correction is

Double Patenting

3. Applicant is advised that should claim 7 be found allowable, claim 10 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10 recites the limitation "said differential voltages" on line 1. This limitation is lack of antecedent basis.

Application/Control Number: 09/752,813

Art Unit: 2631

6. Claims 1-5, 7, 10-16 and 18 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01.

Page 3

Claim 1 does not provide functional/structural/connectional interrelationship between a plurality of current sources (see line 7) with other claimed components (an edge processor, a communication circuit, etc.), and functional/connectional interrelationship between a resistor (see line 9) with other claimed components (the edge processor, the communication circuit, etc.) for making the claimed apparatus as a complete connective and operative system.

Claim 11 does not provide functional/structural/connectional interrelationship between a plurality of current sources (see line 10) with other claimed components (a transmitter, an edge based receiver, a conversion circuit, etc.), and functional/connectional interrelationship between a resistor (see line 9) with other claimed components (the transmitter, the edge based receiver, the conversion circuit, etc.) for making the claimed system as a complete connective and operative system.

Claims, depended on above claims, are therefore, also rejected.

Allowable Subject Matter

7. Claims 8, 9 and 19-24 are allowed.

Response to Arguments

8. Applicant's arguments with respect to claims 1 and 11 have been considered but are moot in view of the new ground(s) of rejection.

Page 4

Application/Control Number: 09/752,813

Art Unit: 2631

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuong Phu whose telephone number is 703-308-0158. The examiner can normally be reached on M-F (8:30-6:00) First Monday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mohammad Ghayour can be reached on 703-306-3034. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
